

Action

This attribute is only available in HTML View.

```
<htmltag data-flx-action = "[action name]" ></htmltag>
```

If an Action is disabled in the Entity Explorer, it must be removed from the HTML tab.

HTML View Actions	HTML Editor	Runtime
 Action without a defined title.	CSSJavaScriptHTML 1<button data-flx-action="SUBMIT">submit</button> 2 ActionsHTML Editor HTML code	

Note that this attribute only adds an "onclick" event with a callback. It does not add the title of the button defined in the Action's properties (unlike the [Button](#) attribute). Therefore, the title of the button has to be added in the HTML Editor.

Another example:

```
<input type="button" data-flx-action="SUBMIT" value="SUBMIT"/>
```
