

Add Work Instructions

You can link a work instruction to a [process operation](#), [operation](#), or [operation step](#).

1. Go to the **Work Instructions** tab of the properties tool pane for a process operation, operation, or operation step.
2. Click  (Link Work Instructions).
3. Select one or more work instructions (hold down the **Ctrl** key) and click **Finish**. Work instructions in status Cancelled are not displayed in the list.
4. Select the **Link as dynamic revision** check box if you want work instructions to appear using the [dynamic revision algorithm](#).

Add Work Instruction Wizard - Step 1 of 1

Select the Work Instruction(s) that you would like to link to the Entity. Click Finish to complete the procedure and close the Wizard.

Options Content search:

Name	Revision	Type	Class	Effective Date	Discontinue Date	Default R
☒ W1_01	1.0	Single				☒
☐ W1_02	1.0	List				☒
☐ W1_01	1.0	Single				☒
☐ EXCV_W1_001	1.0	Single				☒

You are at row 1 of 4. All rows loaded.

☐ Link as dynamic revision

< Back Finish Cancel Help

The work instructions are added to the list on the **Work Instructions** tab in the properties tool pane for a process operation, operation, or operation step
