

Apriso Message Function

The Apriso Message Function enables publishing messages within DELMIA Apriso to interact with other DELMIA Apriso elements.

The function outputs a message in JSON format.

To add the Apriso Message Function

- 1. Drag the Apriso Message Function from the [Toolbox](#) to the Function Navigation diagram, or double-click the Show Message icon in the Toolbox.

- 2. Check **Message in JSON Format** to change the function's input format from a List to JSON.

Apriso Message Function Inputs

Message in List Format

Input	Description
Topic	The topic of the message to be published.
FieldList	List of keys.
ValueList	List of key values.

Message in JSON Format

Input	Description
Topic	The topic of the message to be published.

Message	Message in JSON format.
