

# Button

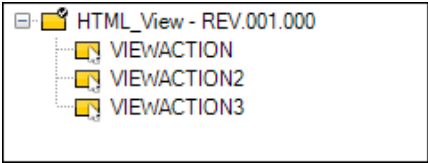

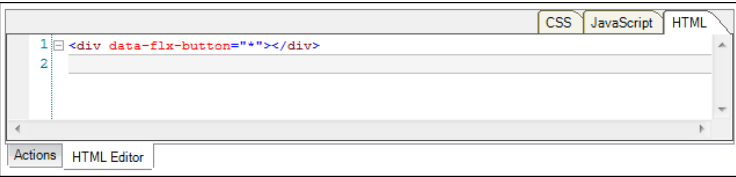

This attribute is only available in HTML View.

```
<htmltag data-flx-button = "[action names]" ></htmltag>
```

Shows the specified Actions. Allowed values:

- ▶ \* or no value - show all Actions
- ▶ "actionname" - show only the specific Action
- ▶ "actonname1,actionname2" - show listed Actions
- ▶ "!actionname" - shows all actions except specified Action
- ▶ "!actonname1,!actionname2" - shows all except listed Actions

If an Action is disabled in the Entity Explorer, it must be removed from the HTML tab.

| HTML View Actions                                                                                                                                        | HTML Editor                                                                                                     | Runtime                                                                                        |
