

Categories

The **Categories** pane is accessible from the **View** menu. Use categories to organize processes, operations, DFCs, screens, views, and layouts in specific groups, such as production, warehouse, or quality. A single entity can belong to many categories. Different entity revisions can also be a part of different categories.

Categories have a hierarchical structure. They are available only in Entity Manager, not in **PB** projects.

Code	Revision	Type	Subtype	Status	Modified	Version
3DMI.ProcessExplosion.Notice.Create.After	APR.3DX.22.1	DFC	Interface	Active	Yes	1.0.0.25
3DMI.ProcessExplosion.Notice.Create.Before	APR.3DX.22.1	DFC	Interface	Active	Yes	1.0.0.10
IM.VipReqResource.Manage	APR.IM.002.000	DFC	Data	Active	Yes	1.0.0.27
IM.ResourceClass.GetByName	APR.IM.000.001	DFC	Data	Active	Yes	1.0.0.20
IM.VipOrder.Process.Json.TTInsert	APR.IM.000.000	DFC	Interface	Active	Yes	1.0.0.5
IM.Product.Manage	APR.IM.23.0	DFC	Data	Active	Yes	1.0.0.2
IM.VipOrder.Process.Json.Asset	APR.IM.23.0	DFC	Interface	Active	Yes	1.0.0.19
IM.VipOrder.Process.Json.Alert	APR.IM.23.0	DFC	Interface	Active	Yes	1.0.0.19
IM.Signature.Role.Link	APR.IM.000.000	DFC	Interface	Active	Yes	1.0.0.19

TMP.NonExemptLabor	APR.TMP.001.000	Screen		Active	Yes	1.0.0.19
TMP.SupervisorSummary	APR.TMP.001.000	Screen		Active	Yes	1.0.0.1
TMP.Schedule	APR.TMP.001.000	Screen		Active	Yes	1.0.0.2
CVR.Header	APR.CVR.000.001	View	Header	Active	Yes	1.0.0.1
TMP.PortalHeader	APR.TMP.001.000	View	Header	Active	Yes	1.0.0.2

There are three main default folders:

- ▶ **All** – contains all entities available in Entity Manager.
- ▶ **Unassigned** – contains all entities that do not belong to any category.
- ▶ **Categories** – contains all your own category folders with entities that you assigned to them.

With no category selected, PB displays all entities. You can drag the category and move it elsewhere on the tree.

Filtering

- ▶ Use the **Find** field to search for a specific category.
- ▶ Use the **Quick Filter** to find a specific entity. To clear all entered values, use  (Clear Filter) or the **Ctrl+E** keyboard shortcut.

Categories Right-Click Menu

Add Category, Rename, Delete, and Properties options are available only for the categories created inside the **Categories** folder.

Add Category	Ins
Rename	F2
Expand All	
Collapse All	
×	Delete Del
🔄	Refresh F5
📄	Properties Shift+F4

Option	Shortcut	Description
Add Category	Ins	Displays the Category Editor , where you can add a new category folder.
Rename	F2	Changes the name of the selected category.
Expand All	N/A	Expands the whole tree or the contents of the selected folder.
Collapse All	N/A	Collapses the whole tree or the contents of the selected folder.
Delete	Del	Removes the selected category. Deleting a category does not remove its entities from the system.
Refresh	F5	Refreshes the content.
Properties	Shift+F4	Displays the Category Editor with properties of the selected category.

How To

- Add an entity to a category
- Remove an entity from a category
- Copy an entity to a category
- Move an entity from one category to another
