

Check an Entity In/Out

To Check Out (Lock) an Entity

1. Launch [Entity Manager](#) or [Project Entity Manager](#).
2. Select the entity to check out from the list.
3. Use one of the following options:
 - ▷ Click  (Check Out) on the [toolbar](#).
 - ▷ Choose **Check Out** from the [Entity](#) main menu.
 - ▷ Select **Check Out** from the Entity Manager [right-click menu](#) or Project Entity Manager [right-click menu](#).

If you lock an entity that is open in a tab, the lock is automatically released when you close the tab.

After checking out the entity, your login name appears in the **Locked By** column in Entity Manager or Project Entity Manager.

If the entity is already locked by another user, you can:

- ▶ Open the entity in the read-only mode. In the case of processes, you can still print or save the operation navigation diagram. In the case of DFCs, you can still save the step navigation diagram.
- ▶ Copy your changes manually to another entity.
- ▶ Check out the locked entity. The other user will not be able to save their work and the entity will become locked by you.

To Check In (Unlock) an Entity

1. Launch [Entity Manager](#) or [Project Entity Manager](#).
2. Select the entity to check in from the list.
3. Use one of the following options:
 - ▷ Click  (Check In) on the [toolbar](#).
 - ▷ Choose **Check In** from the [Entity](#) main menu.
 - ▷ Select **Check In** from the Entity Manager [right-click menu](#) or Project Entity Manager [right-click menu](#).

The entity will be unlocked and your login name disappears from the **Locked By** column in Entity Manager or Project Entity Manager.
