

Compare DFCs or Projects

The **Compare** option highlights the differences between two DFCs or two revisions of the same project.

To Compare Two Revisions of the Project

For details on comparing the projects, see [Compare and Merge Projects](#).

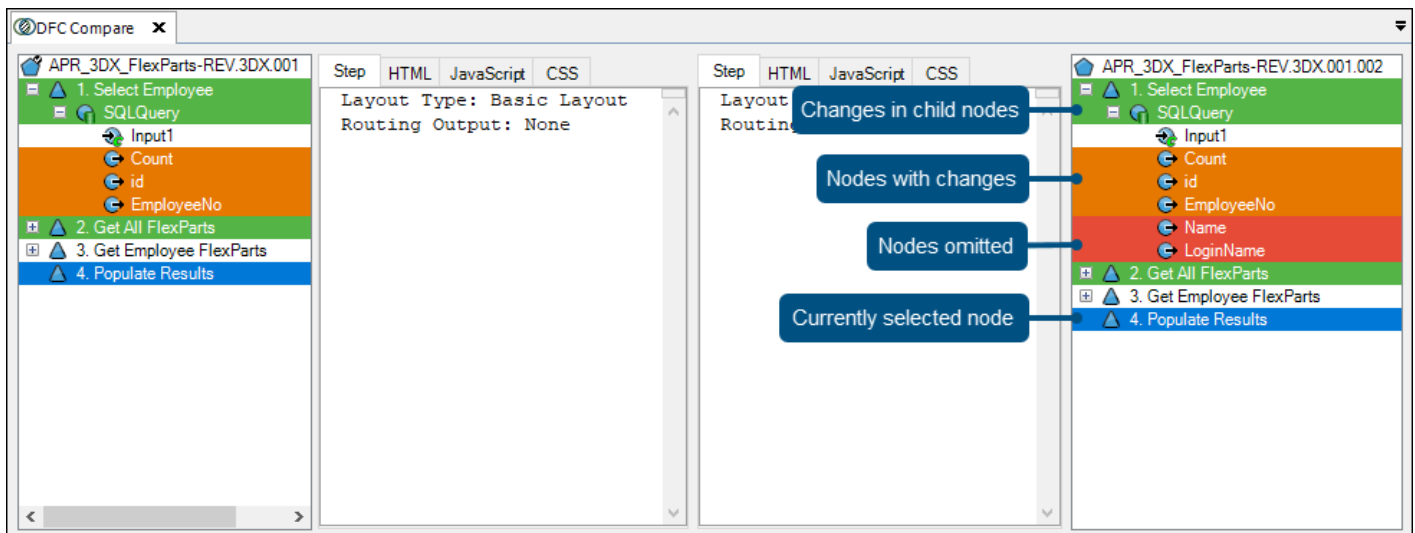

To Compare Two DFCs

1. In **Entity Manager**, **Project Entity Manager**, or **Project Compare** select two DFCs.
2. Open the **DFC Compare** tab:
 - ▶ Right-click the DFCs and choose **Compare**.
 - ▶ Choose **Compare** from the **Entity** menu.
 - ▶ Click  (Compare) from the **toolbar**.

DFC Compare Tab

The functionality compares the following elements of the same name:

- ▶ Steps (layout type, routing outputs).
- ▶ HTML Layout (HTML, CSS, and JavaScript tabs).
- ▶ SQL and Oracle queries (case is ignored).
- ▶ User formulas.
- ▶ Function inputs and outputs (types, sources, values, and other properties).
- ▶ Business Control configurations (if they are stored in XML).

Compared elements are displayed in tree views with differences highlighted:

- ▶ Nodes with changes detected in child nodes are marked in **green**.
- ▶ Nodes that differ between two DFCs are marked in **orange**.
- ▶ Nodes that are omitted are marked in **red**. For example, steps added to the newer revision, or inputs with different names.
