

Control the Number of Entities Loaded to Process Builder

1. Select **Tools > Options** from the **Main Menu**.
2. Choose the **Advanced** tab.
3. Use one of the following options from the **Entities loading mode** section:
 - ▷ Select **Do not load cancelled entities if there are more than 1500 entities of one type** (this is the default option) in order to limit the number of loaded entities to Process Builder
 - ▷ It is also possible to change the number of entities loaded with use of the "MaxNumberOfEntitiesToLoad" key located in the "ProcessBuilder" section of the Central Configuration file (for details see [Central Configuration Documentation](#))
 - ▷ Select **Always load entities** in order to load all entities regardless of the total number of entities
