

Create a New Entity

To Launch the New Entity Wizard

Use one of the following options:

- ▶ Click  (New...) on the toolbar.
- ▶ Select **New...** from the **File** main menu.
- ▶ Select **New** from the [right-click menu](#) in Entity Manager or the [right-click menu](#) in Project Entity Manager.
- ▶ Use the `Ctrl+N` keyboard shortcut.

When naming the entity, it is recommended to use the naming conventions discussed in the [Best Practices](#) section.

You can force naming conventions for an entity revision using the `RevisionNamingConventionMask`, `DefaultRevisionName`, or `RevisionNamingConventionDescription` keys located in the `ProcessBuilder` section of the Central Configuration file. For details, see [Central Configuration Documentation](#).
