

Find/Replace Dialog Box

The Find\Replace dialog box offers you the following functionalities:

- ▶ Find all of the occurrences of a word or string as defined in the **Find what** box
- ▶ Replace the occurrences of a word or string as defined in the **Find what** box with a new word or string as defined in the **Replace with** box

Field	Description
Match case	If selected, the search action distinguishes uppercase and lowercase characters.
Match whole word	If selected, only the entire occurrences of a word are included in the search. For example, if you search for "the," this option will ensure that words such as "theater" or "theme" are not included in the search results.
Search up	Select this to search backwards (towards the beginning of the document) from the current cursor point.
Use	Indicates how to interpret the special characters entered in the Find what or Replace with text boxes. The options include: ▶ Regular expressions ▷ When this option is chosen, you can use regular expressions in your search criteria ▷ For example, you could search segments that contain email addresses in the text ▷ Regular expressions are used to search text for all occurrences of a particular sequence, or pattern, of characters ▶ Wildcards ▷ When this option is selected, you can use wildcards (special characters such as asterisks "*" and question marks "?") in your search criteria ▷ Use a question mark ? wildcard to match a single character at the current position ▷ Use an asterisk * wildcard to match zero or more characters at the current position
Search hidden text	If selected, this locates instances of the text that are concealed or collapsed.
Search in selection	If selected, this finds only the text within the selected text in the direction of the search.
Find Next	Searches for the next occurrence of the characters that are specified in the Find what box. To find the previous occurrence, hold down SHIFT and then click Find Next .

Replace	Replaces the selected occurrence of the text in the Find what box, finds the next occurrence, and then stops.
Replace All	Replaces all of the occurrences of the search criteria in your document.
Mark All	Marks with a bookmark lines in the current active text editor file that contain the text specified in the Find what box.
Close	Closes the Find/Replace dialog box.
