

Form View Type: Overview

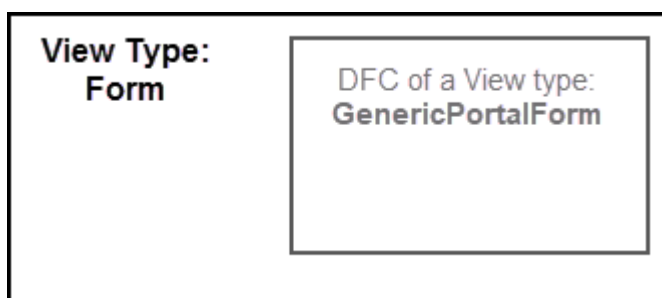

View Runtime

The Form View type allows for building a user interface with various controls such as text boxes, drop-down lists, combo boxes, time pickers, etc.

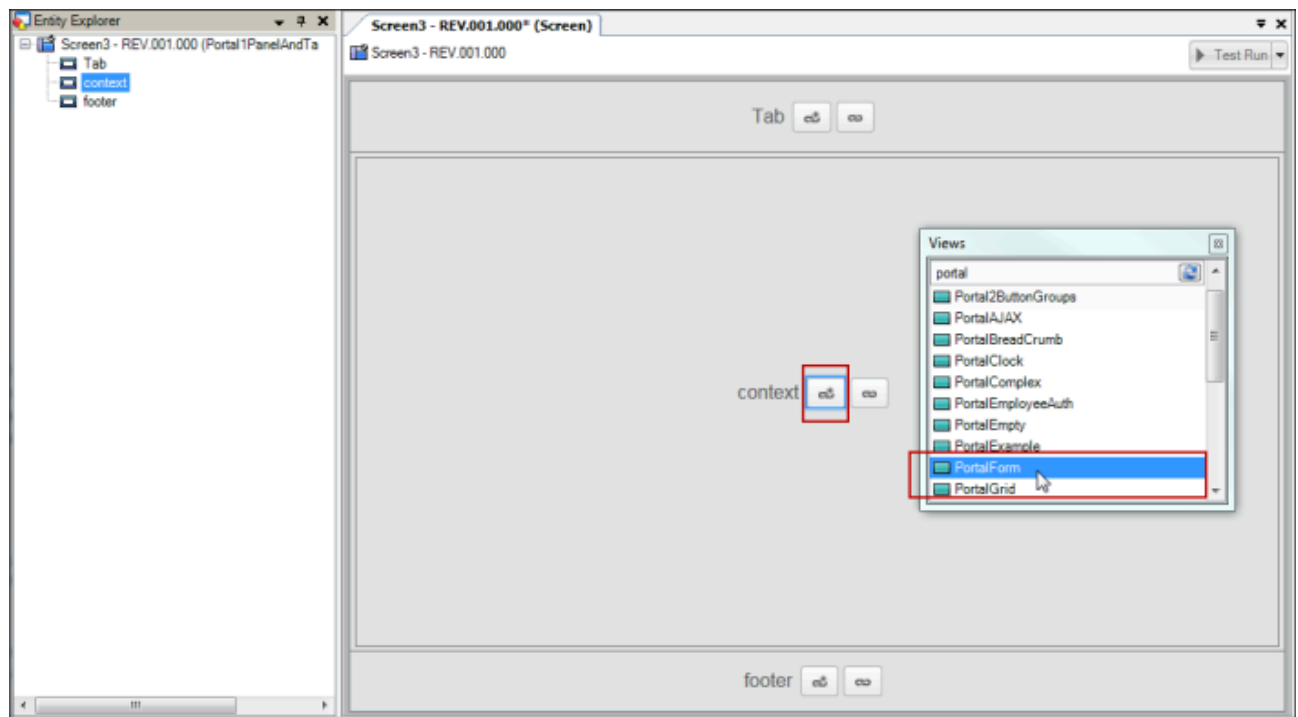

Functional Overview

- ▶ View type: Form
- ▶ DFC: **GenericPortalForm**
- ▶ No Business Control is required

Configuration

1. Copy and link the **PortalForm View Template** in the Screen workspace:

2. The following configuration options are available for the linked View:

- ▶ Adding Buttons with Actions (for details, see [View Workspace: Forms Tab](#))
- ▶ Adding groups (for details, see [View Workspace: Forms Tab](#))
- ▶ Adding controls within groups (for details, see [View Workspace: Forms Tab](#))
