

General View Template: Grid

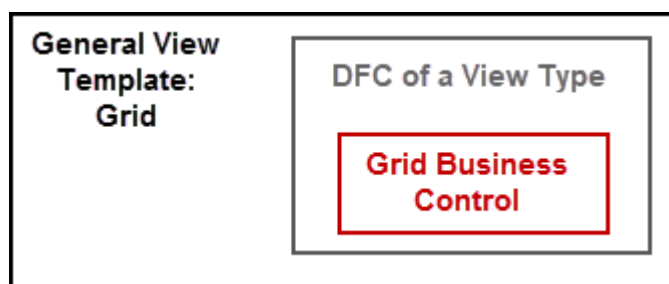

View Runtime

The Grid View template allows for using different configurations of a grid.

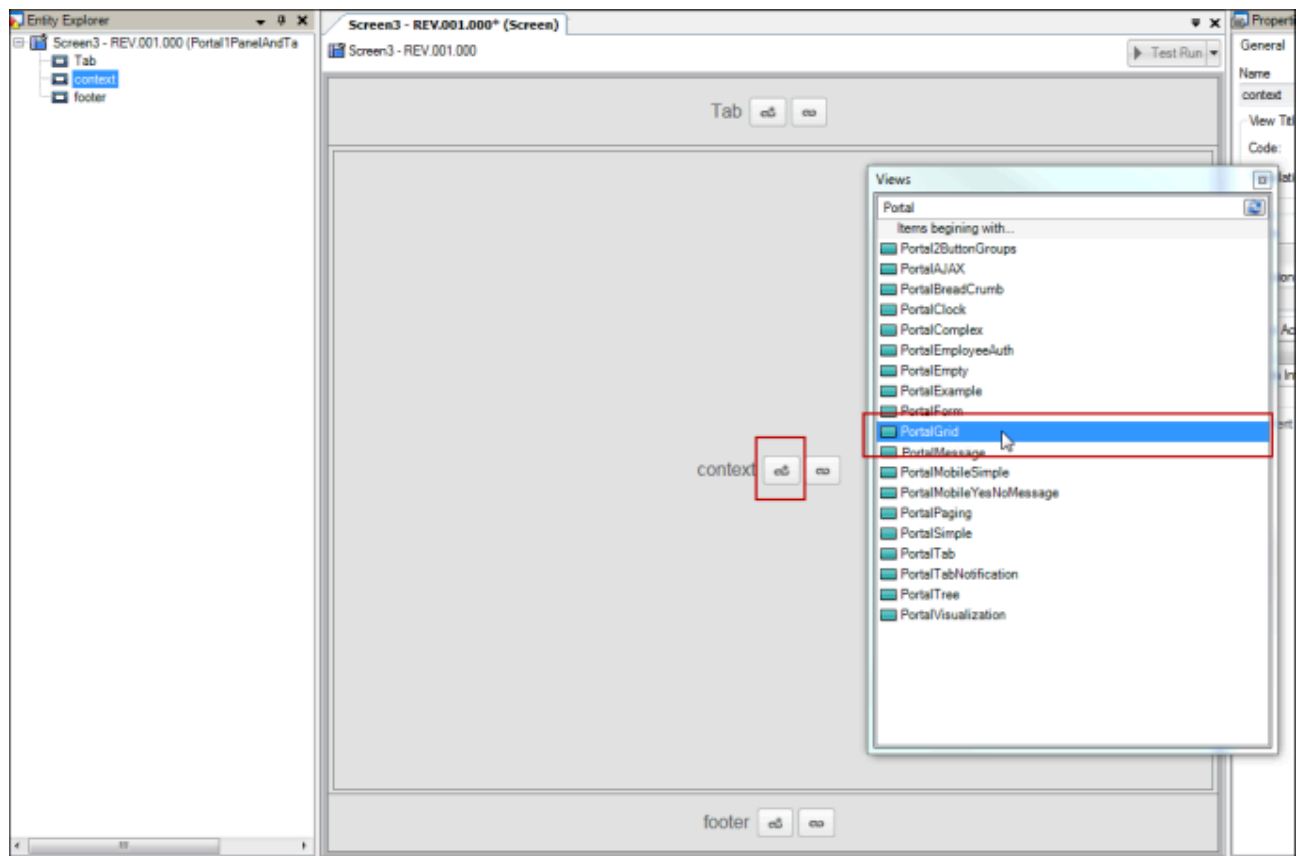

Functional Overview

- View type: General
- DFC of a View type (the name of this DFC should be the same as the name of the View)
- Business Control used: **Grid Business Control**

Configuration

1. Copy and link the **PortalGrid View Template** on the Screen workspace:

2. The following options are available:

- ▶ Configuration of Business Controls (for details, see the [Grid Business Control](#) settings)
- ▶ Configuration of Buttons inside the Grid (for details, see the [Toolbar Buttons Editor](#) in the Grid Business Control)
- ▶ Configuration of Actions that are added to the View Grid as Buttons (for details, see the **Availability Mode** and **Group Tag** properties on the [View Action: General Tab](#))
- ▶ Configuration of click or double-click Actions on a row (for details, see the **Display Row Selector/Click Mode**, **Row Single Click Mode**, and **Row Double Click Mode** options on the [Grid Business Control](#))
