

General View Template: Tab

View Runtime

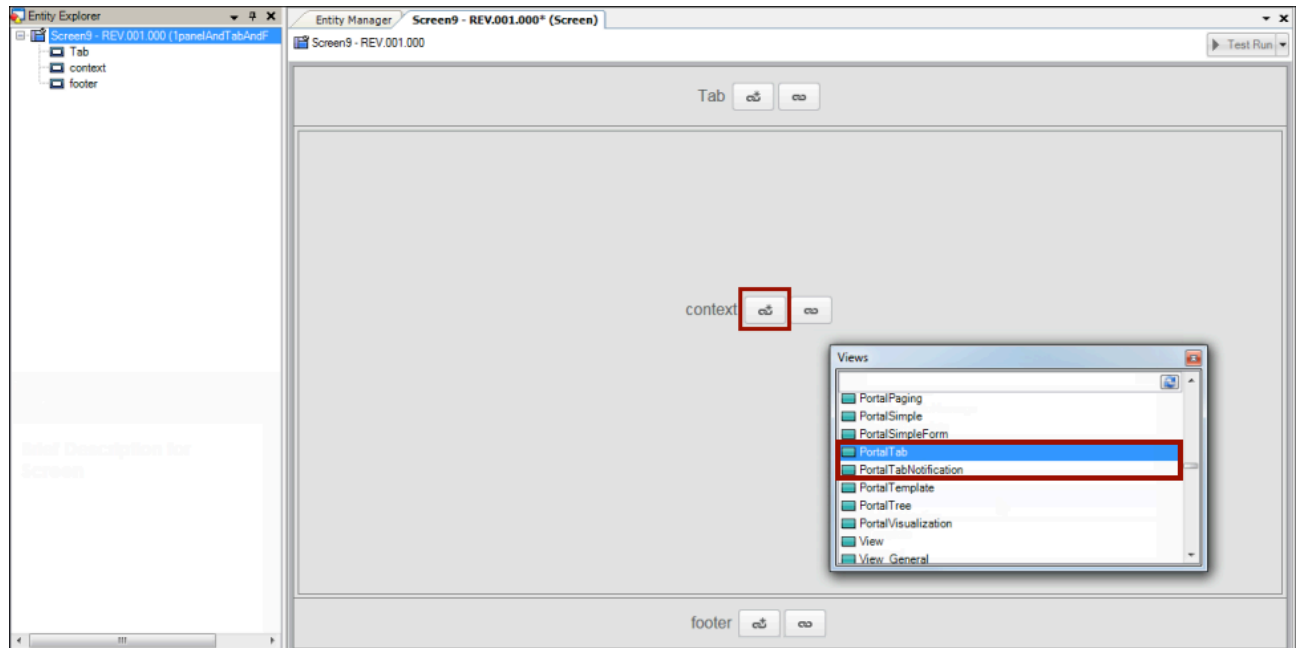

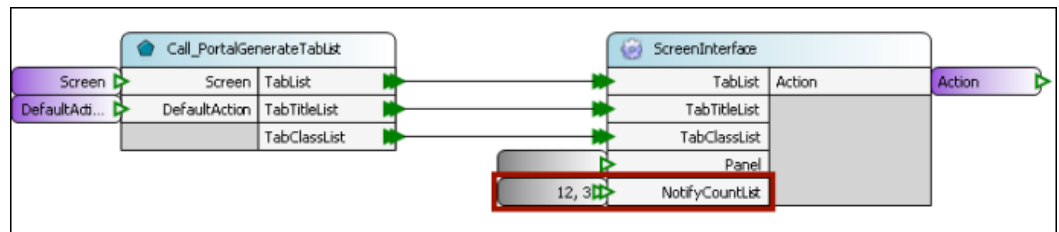

Functional Overview

- View type: General
- DFC of a View type: **GenericPortalTab**
- No Business Control is required

Configuration

1. Either simple Tabs or notification Tabs can be configured:
 - For simple Tabs, copy and link the **PortalTabView Template**
 - For notification Tabs, which are able to display notification numbers (like the **Alert List** Tab in the image above), copy and link the **PortalTabNotificationView Template**
 - The **NotifyCountList** Input can be configured in the DFC linked to this View, and the numbers passed to this Input are displayed on subsequent Tabs as notification numbers:

2. The following options are available:
 - ▷ Configuration of Actions of the Tab type
 - ▷ The number of Tabs to appear is the number of Tab Actions in the View (for details, see [View Action: General Tab](#))
 - ▷ The default (active) Tab is the one you set in the **Default Action** menu in the Screen Panel properties (for details, see [Panel: General Tab](#))

Translating Tab Names

For information on translating tab names, see [Translations Highlighting \(Translation Mode\)](#).
