

View HTML: HTML Editor

The HTML Editor is a simplified HTML Layout Editor. The editor consists of three tabs: [HTML](#), [JavaScript](#), and [CSS](#). It supports [Inputs](#) and [Outputs](#), [Screen Literals](#) and [Conditionals](#).

HTML Tag Attributes

HTML Editor supports special attributes listed [here](#).

HTML Editor also supports additional attributes that can be used in an HTML tag:

- ▶ [Action](#)
- ▶ [Button](#)
- ▶ [Disable Button](#)
- ▶ [Tab](#)
- ▶ [Tab Text](#)

These attributes are parsed and interpreted by various [converters](#) that generate regular HTML and JavaScript. You can add your own [custom converters](#) that parse custom attributes.

HTML Editor does not support all the attributes that are available in the HTML Layout Editor, like [Controls Tags](#).

Due to a third-party issue, the DataList control is not displayed in PB Test Run and in DELMIA Apriso Desktop Client. However, it works correctly in DELMIA Apriso Portal.

Toolbox

The Toolbox for the HTML Editor contains [custom snippets](#) that can be dragged and dropped to the HTML tab.
