

Iterate

```
<htmltag data-flx-iterate="i,ListA,ListB"></htmltag>
```

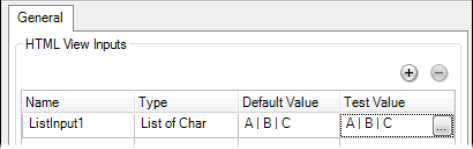

"data-flx-iterate" duplicates the specific "htmltag" based on the parameters (e.g., or <tr>)

Inputs

► DFC Function Navigation:

► HTML View:

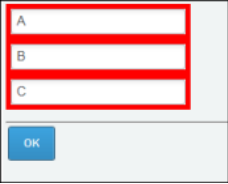

HTML Layout Editor/HTML Editor

HTML code

Runtime

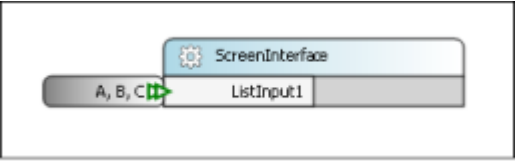

In this case, the style from the div tag is applied to every element from the list.

The Iterate converter cannot be used with the Complex data type.

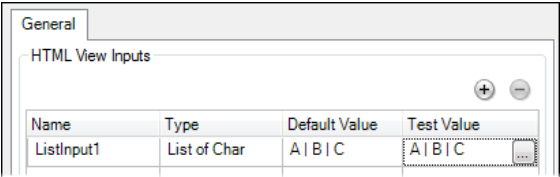

Iterate with Children

Inputs

► DFC Function Navigation:

► HTML View:

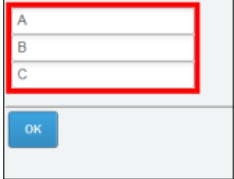

HTML Layout Editor/HTML Editor

HTML code

Runtime

In this case, the style from the div tag is applied once for all of the elements from the list.
