HTML Layout Editor/HTML Editor	Runtime
HTML code	press F8
HTML code	press spacebar

The screenshot displays a web application interface. On the left, an HTML code editor shows the following code:

```
1 <input type="text" data-flx-key="#65" onclick="alert('a');"/>
```

Below the code editor, the text "HTML code" is visible. On the right, the user interface consists of a text input field and an "OK" button. A red arrow points from the input field to a second, identical UI element below it, with the text "press A" next to the arrow. This second UI element has an alert dialog box open, titled "Message from webp...", displaying a yellow warning icon and the character "a". The dialog box has an "OK" button.
