

# Layout: Entity Explorer Right-Click Menu

## Layout

| Command                                   | Description                                                                                                                                 |
|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Add Panel</b>                          | Adds a Panel.                                                                                                                               |
| <b>Create Screen based on this Layout</b> | Creates a Screen based on the Layout.                                                                                                       |
| <b>Change Status</b>                      | Changes the status of a Layout (for more information, see <a href="#">Entity Status Types</a> ).                                            |
| <b>Change Status Recursively</b>          | Recursively changes the status of a Layout. <div>Recursive change means changing the status of the entity and all its child entities.</div> |
| <b>Expand All</b>                         | Expands the list of all entities for the selected Layout.                                                                                   |
| <b>Collapse All</b>                       | Collapses the list of entities for the selected Layout.                                                                                     |
| <b>Refresh</b>                            | Refreshes the diagram.                                                                                                                      |

## Panel Linked Under a Layout or another Panel

| Command                | Description                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Add Panel</b>       | Adds a Panel to the Layout.                                                                                                            |
| <b>Move Panel Up</b>   | Moves the Panel up in the structure. <div>This option is available only if there is at least one Panel above the selected one.</div>   |
| <b>Move Panel Down</b> | Moves the Panel down in the structure. <div>This option is available only if there is at least one Panel below the selected one.</div> |
| <b>Rename</b>          | Changes the Panel's name.                                                                                                              |
| <b>Delete</b>          | Deletes the selected Panel. <div>A Panel can only be removed if the Layout to which it is linked is not used in any Screen.</div>      |
| <b>Expand All</b>      | Expands the list of all entities for the selected Panel.                                                                               |
| <b>Collapse All</b>    | Collapses the list of entities for the selected Panel.                                                                                 |
| <b>Refresh</b>         | Refreshes the diagram.                                                                                                                 |
