

Main Menu Bar

The main menu provides access to many high-level administrative and entity functions.

File

Item	Description
New	Displays New Entity Wizard , where you can create a new process, operation, DFC, screen, view, layout, action script, or project.
Open	Displays a dialog box that lets you open a process, operation, DFC, screen, view, layout, action script, or project.
Save	Saves the currently open entity.
Save As	Saves the currently open entity under a different name.
Save All	Saves of all open entities.
Close	Closes the currently open window.
Connect	Enables connecting to a DELMIA Apriso server.
Disconnect	Enables disconnecting from a DELMIA Apriso server.
Print	Enables printing the step navigation diagram.
Print Preview	Provides a preview of the step navigation diagram.
Exit	Exits the application.

Edit

Item	Description
Undo	Undoes a change.
Redo	Redoes a change (active only if Undo was used).
Cut	Copies the selected element of the step or function navigation to the clipboard and removes it from the entity workspace and the Entity Explorer tree.
Copy	Copies the selected element of the step or function navigation to the clipboard.
Paste	Inserts the last copied element of the step or function navigation from the clipboard into the entity workspace and the Entity Explorer tree .
Delete	Deletes selected elements.
Duplicate Selection	Duplicates the element of step navigation to a new one or to a new revision.
Advanced Find	Displays the Advanced Find tool pane.
Properties	Displays the entity Properties tool pane unless it is already open.
Rename	Renames: ▶ The selected step or function navigation element of Entity Explorer. ▶ A PB project module.
Select All	Selects all entities in the Entity Manager or Project Entity Manager .

View

This menu controls the visibility of the following tool panes:

- ▶ **Entity Explorer**
- ▶ **Session Variables**
- ▶ **System Parameters**
- ▶ **Validation Messages**
- ▶ **Rich Text Description**
- ▶ **Categories**
- ▶ **Preview**
- ▶ **Change Orders**
- ▶ **Action Script Output**
- ▶ **Background Tasks**
- ▶ **Recent and Favorite Items**
- ▶ **Toolbox**
- ▶ **Unit Test Explorer**
- ▶ **Properties**

The remaining options:

Item	Description
Designer	Switches back to the designer view when DFC or screen are in the Test Run mode.
Test Run	Opens the selected DFC or screen in Test Run .
HTML Source	Displays developer tools. This option is active only in Test Run mode. For more information, refer to the <i>Google for Developers</i> documentation..
Full Screen	Displays the workspace in full-screen mode.
Refresh	Refreshes the workspace.

Managers

This menu displays:

- ▶ The following Process Builder tabs:

- ▷ Project Manager
- ▷ Entity Manager
- ▷ Action Script Manager
- ▷ Business Component Repository
- ▷ Web Services Manager
- ▷ Issue Flows Manager

- ▶ The following DELMIA Apriso Desktop Client (ADC) screens, accessible also from ADC:

- ▷ Dictionary
- ▷ System Parameters and Lists
- ▷ Determinations
- ▷ Documents
- ▷ Work Instructions
- ▷ Change Management
- ▷ Specifications
- ▷ Issue Properties

You can access the **Issue Properties Manager** only if you are assigned the *Issue Management Process Author* role. For more information on the roles used in Process Builder, see [Security Roles](#).

- ▷ [FlexParts](#)
- ▷ [Project Runtime Configuration](#)

Tools

Item	Description
Translate	Displays the Dictionary Links screen in context of the selected DFC, screen, or view. For more information, refer Dictionary Help .
Import Translated Literals	Enables importing literals from an XML file that was translated with the DELMIA Apriso Translation Tool.
Export Literals for Translation	Enables exporting literals from a process, operation, or DFC to an XML file, which you can translate in the DELMIA Apriso Translation Tool.
SQL Query Editor	Displays the SQL Query Editor .
Rename Action Script References	Displays the Renaming Action Script References window that you can use to rename invalid references to action script functions in screen flow entities.
Options	Displays the Options window.

Entity

Item	Description
Change Status	Changes the status of the selected one or more entities. For more information, see Change the Status of an Entity .
Change Status Recursively	Changes the status of the selected entity and its child entities. The recursive status change works only for the prototype, development in progress, or active statuses. For more information, see Change the Status of an Entity .
Show Usages	Displays the pop-up window listing all entities that use the selected entity.
Compare	Displays the DFC Compare tab for two selected DFCs or Project Compare tab for two selected project revisions.
Validate	Validates if the selected entity is designed correctly and can be properly executed. The validation results are displayed: ▶ In the Entity Validation Result window – when the entity validation runs in Entity Manager or Project Entity Manager. ▶ In the Validation Messages tool pane – when the entity validation runs in an open entity.
Compile	Compiles a DFC in the prototype, development in progress, or active status or an action script.
Generate Diagram Snapshots	Creates snapshots of DFC navigation, DFC step navigation diagrams, or Layout Editor view and stores them in database. Generating multiple diagram snapshots is possible by selecting more than one entity.
Publish as FlexPart	Enables publishing the selected DFC or screen in the prototype, development in progress, or active status as a FlexPart. After publishing the entity, the FlexPart link can be copied from the Other Entities tab of the Show Usages window. For more information, refer to FlexParts Help .

	This option is only available for screens with the selected Base Screen box checked in the screen properties. The type of the created FlexPart can be set to screen or offline screen.
Check-In	Removes the lock from the selected entity.
Check-Out	Locks the selected entity for editing by the current user.
New Revision/Duplicate	Displays the Duplicate Entity window to create a new revision of the selected entity or a new entity with a different name and revision. You can also select many entities and create a new revision for all of them.
Propagate Desktop Prompts	Copies all desktop prompts to mobile and text prompts. Mobile and Text platforms are no longer supported.
Generate Apriso Unit Test	Generates Apriso Unit Test code for a DFC. See Apriso Unit Tests Framework Documentation for details.

Navigation

Item	Description
Add Step	Adds a new step to a DFC or operation.
Edit Description	Allows the addition and editing of a step's description.
Set Routing Output	Enables setting a function output that will be used as an output routing of a DFC step.
Change Routing Value	Allows the changing of the value used for a step routing.
Autolayout	Automatically places elements on the Flow diagram.
Show/Hide Step Description	Controls the visibility of a step description.
Save As Image	Saves the Flow Diagram as an image to a file.

Functions

The following options are available only for **DFCs**:

Item	Description
Add Function	Adds a new function to the step.
Add Input	Adds an input to the selected function.
Add Output	Adds an output to the selected function.
Add Pair	Adds both the input and output mapped together to the selected function. This option is available only for the Input to Output function type.
Add Session Routing	Adds a routing disposition for a function output to a session variable.
Add Machine Routing	Adds a routing disposition for a function output to a machine.
Add User Routing	Adds a routing disposition for a function output to a screen.
Add External Routing	Adds a routing disposition for a function output to a DFC's external output.

Window

Item	Description
Close	Closes the current tab.
Close All Windows	Closes all open windows.

Help

Item	Description
Contents	Displays the contents of the Help.
Database Documentation	Opens the web application which enables users to view information about DELMIA Apriso tables.
Business Components Documentation	Opens the web application which contains documentation with a summary of all Business Components (BC) available in DELMIA Apriso.
Show Welcome Screen	Opens the Welcome Screen with basic information about Process Builder.
About	Provides information about the release of Process Builder being used.
