

Manage Links

For details on adding and removing links, see [Links](#).

To Move a Link

1. Use one of the following options:
 - ▷ Drag the link from the source location in the **Links** tab or **Entity Explorer** and drop it in the target entity or step in **Entity Explorer**.
 - ▷ Select the link in the **Links** tab or **Entity Explorer** and:
 - ▷ Use the `Ctrl+X` and `Ctrl+V` keyboard shortcuts.
 - ▷ Choose **Cut** and **Paste** from the **Edit** menu.
 - ▷ Click  (Cut) and  (Paste) in the toolbar.
 - ▷ Choose **Cut** and **Paste** from the **Entity Explorer** right-click menu or the **Links** tab right-click menu.
2. The link disappears from the source location and reappears in the target one.

To Copy a Link

1. Use one of the following options:
 - ▷ Hold the `Ctrl` key and drag the link from the **Links** tab or **Entity Explorer** and drop it in the target entity or step in **Entity Explorer**.
 - ▷ Select the link in the **Links** tab or **Entity Explorer** and:
 - ▷ Use the `Ctrl+C` and `Ctrl+V` keyboard shortcuts.
 - ▷ Choose **Copy** and **Paste** from the **Edit** menu.
 - ▷ Click  (Copy) and  (Paste) in the toolbar.
 - ▷ Choose **Copy** and **Paste** from the **Entity Explorer** right-click menu or the **Links** tab right-click menu.
2. A copy of the link (containing the same details) appears in the target location.

Edit the Details of a Link

Only the details of characteristics, resources, and components are editable.

1. Use one of the following options:
 - ▷ Right-click the link in the:
 - ▷ **Links** tab, and choose **Details** from the right-click menu.
 - ▷ **Entity Explorer**, and choose **Details** from the right-click menu.
2. An editable properties dialog box for the selected link appears. Modify the details, and click **OK** to confirm.

The **Link Details** screen opens in a read-only mode if the link was configured on an operation level. To edit it, access it from an operation context instead.

The screen is editable for the links added from a process (even those added to linked operation).

Preview a Document

1. Use one of the following options:
 - ▷ When adding a document, you can select it and use the **Preview** option in the **Link Document Wizard**.
 - ▷ Select a linked document from the **Links** tab and choose **Preview** from the right-click menu.
2. The document opens in the appropriate viewer, for example Adobe® Reader®.
