

Manage Operations

Add a New Process Operation

1. Choose **Add New Operation** from the [right-click menu](#).
2. Fill in all fields in the **New Operation** pop-up window:

3. Click **OK**.

The system adds the new operation to the diagram and [Entity Explorer](#) tree.

Select an Operation

To Select a Single Operation

Use one of the following options:

- ▶ Click the operation or draw a box around it in the operation navigation workspace.
- ▶ Select the Operation in the [Entity Explorer](#) tree.

To Select a Group of Operations

Use one of the following options:

- ▶ Draw a box around the operations that you want to select.
- ▶ Click the operation that you want to select while holding down the `Ctrl` key.

The selected operations will become highlighted and move together as a group.

Move an Operation

To Move a Single Operation

1. Select the operation that you want to move.
2. Drag and move the operation in the operation navigation workspace.

To Move a Group of Operations

1. Select the group of operations that you want to move.
2. Drag and move the group in the operation navigation workspace.
