

HTML View Outputs

It is possible to bind an HTML View Input to an Output:

```
<input type="text" value="{Input}" data-flx-bind="Output"/>
```

Writing a Value to an Output from an HTML View Input

Inputs/Outputs

General

HTML View Inputs

Name	Type	Default Value	Test Value
\$ScreenModel	Char		
Input1	Char	SomeValue	

HTML View Outputs

Name	Type	Auto Submit
Output1	Char	☒

HTML Editor

CSSJavaScriptHTML

1<input type="text" value="{Input1}" data-flx-bind="Output1"/>

2<button data-flx-action="VIEWACTION">submit</button>

HTML code

Runtime

SomeValue

submit

Debug Results

doc_screen_1 - REV.001.000 - client time: 00

DISPLAY - doc_html_view - REV.001.000

\$ScreenModel: {}

Input1: SomeValue
