| View                                           | <div><div><div>▶ <b>Name</b> – the name of the View to be displayed in this Panel on any Screen that uses this Layout (this can be overridden by the Screen configuration). When a Screen uses an <b>embedded Layout</b>, the field displays the name of the default View that was linked to the Panel when the Layout became embedded.</div><div>▶ <b>Revision</b> – the revision of the default View; the following actions are available:<div><div>▶  – invokes the <b>Views</b> lookup window, where the user can copy and link a View.</div><div>▶  – invokes the <b>Views</b> lookup window, where the user can link a View.</div><div>▶  – unlinks the linked View.</div><div>▶  – invokes the workspace of the linked View.</div></div></div></div><div><div>In the case of PB Projects, the pop-up displays default revisions of Views in the current Project.</div></div></div>                                                                                                                               |
| Default Action                                 | The Action executed when no other Action was invoked. The drop-down menu lists all the Actions available in the View (on the selected Panel).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Refresh Interval Time [s]                      | The time interval in seconds after the View will be refreshed. This option can be used only with <b>AJAX Views</b> requests. When it is set to 0, the refresh is off.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
