

Process Properties

The functionalities related to process authoring are deprecated and will not be further developed.

To Launch the Process Properties Tool Pane

- 1. In the Entity Explorer, select a process from the list.
- 2. Choose one of the following options:
 - ▷ Use the `F4` keyboard shortcut.
 - ▷ Choose **View > Properties** from the [Main Menu](#).

You can also open the [Entity Properties](#) window by selecting a process or operation and using one of the following options:

- ▷ Choose **Properties** from the [Right-Click Menu](#).
- ▷ Use the `Shift+F4` Keyboard Shortcut.

and

Version

1.0.0.3

Edit Mask...

Version host

☒ Allow editing in Prototype mode

Field	Description
Name	Translated name of the process. The name can be up to 80 characters long. Process name is unique across Process Builder.
Process code	Internal name of the process.
Revision	The revision of the process. Process revision is unique across Process Builder. This field is read-only.
Default Revision	The revision of the process that is used in runtime. It is selected by default for a newly created process (next revisions of the process are not selected as the default ones).
Description	The description of the process.
Valid Between	Enables changing the date range for the validity of the process. Values are not validated when changing. If values are

	incorrect, a warning is displayed during the entity validation.
Version	An auto-incremented number of a process that increases when you modify and save the entity. Click Edit Mask to enter a custom mask.
Version host	The name of the last server where a process has been modified.
Allow editing in Prototype mode	If enabled, the entity can be edited in the prototype status. This setting is selected when creating the entity.
