

Screen Header

The Header can be displayed in the following environments:

- ▶ DELMIA Apriso Portal
- ▶ DELMIA Apriso Desktop Client

A Header is always displayed in the DELMIA Apriso Portal, so there is no need to link it to a screen.

The Header should not be linked to screens intended for use in DELMIA Apriso 3DEXPERIENCE Platform Widget.

For the DELMIA Apriso Desktop Client, the Header needs to be [linked to the screen](#) or [linked to the layout](#) in order to be displayed.

Standard Header Functionalities

- ▶ Breadcrumbs
- ▶ Search (allows for searching only base screens with security)
- ▶ Standard buttons (Back, Home, Help)
 - ▷ The help button can be linked to custom documentation content prepared for the created screen – for details, see [Linking Custom Documentation Content to a Screen](#)
 - ▷ These can be enabled or disabled
 - ▷ Additionally, custom buttons can be added that call any action
- ▶ Clock
- ▶ User Information (clicking the portrait reveals the **Logout** button)
- ▶ Additional Information (can be added by the user by linking the [Header View DFC](#))

For details on Header configuration refer to [Header View Type](#).
