

Screen: Entity Explorer Right-Click Menu

Screen

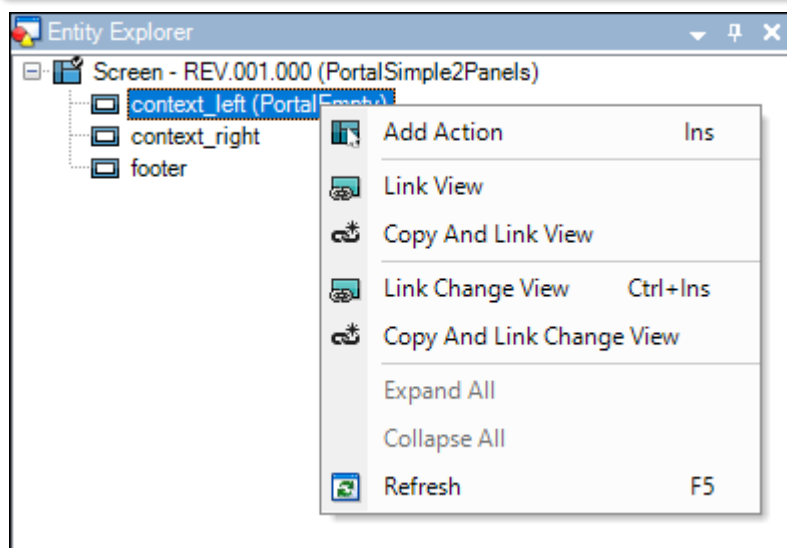

This is the root element in the structure.

Command	Description
Link Layout	Links the Layout. Opens the Layouts pop-up window with a list of available Layouts to be linked.
Change Status	Changes the status of a Screen (for more information, see Entity Status Types).
Change Status Recursively	Recursively changes the status of a Screen. Recursive change means changing the status of the entity and all its child entities.
Expand All	Expands the list of all entities for the selected Screen.
Collapse All	Collapses the list of entities for the selected Screen.
Refresh	Refreshes the diagram.

Panel with/without a Linked View

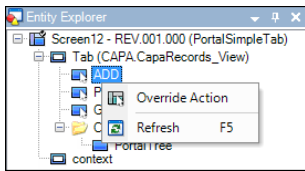

The image below is of a context menu for a Panel with a linked View. However, the commands described below include those for Panels with a linked View and Panels without a linked View.

Command	Description
Add Action	Adds an Action on the current Screen as the extension of a View linked to a Panel. This option is available only for Panels with linked Views .
Link View	Links the View. Opens the Views pop-up window with a list of available Views to be linked.
Copy And Link View	Displays a list of the Views that can be duplicated and linked.

	When using the Copy And Link View functionality, the copy of the View and its linked DFC is created automatically.
Link Change View	Links the Views that will be available for display on the current Panel. Change View is controlled by Actions. This option is available only for Panels with linked Views.
Copy And Link Change View	Displays a list of Views that can be duplicated and linked to the Change View. When using the Copy And Link Change View functionality, the copy of the View and its linked DFC is created automatically. Linked Views will be available for display on the current Panel. Change Views are controlled by Actions. This option is available only for Panels with linked Views.
Expand All	Expands the list of all entities for the selected Panel.
Collapse All	Collapses the list of entities for the selected Panel.
Refresh	Refreshes the diagram.

Action Linked to a Panel

Command	Description
Override Action	Makes it possible to change the properties of an Action that is linked to a Panel together with its View.
Refresh	Refreshes the diagram.
