

Step Navigation Right-Click Menu

Step Navigation Workspace

The right-click menu can be accessed by using the context menu keyboard key or by right-clicking anywhere in the Step Navigation Workspace.

Available options:

Command	Description
Add Step	Adds a new step to the step navigation.
Add Existing Step	Displays the list of DFCs from which you can choose an existing step.
Add Decision Step	Adds a Decision Step (see Step Navigation Diagram Elements).
Add Step with Sub-DFC	Opens a wizard with DFCs to choose from (see Create Step with Sub-DFC Wizard).
Add Stop Node	Adds a stop node to the diagram.
Paste	Pastes the Step from the clipboard.
Autolayout	Automatically arranges all of the items in the diagram (this option is also available when an entity is in the active status).
Save As Image	Saves a flow diagram as an image (this option is also available when an entity is in the active status). An alternative method here is to select entities and press <code>Ctrl+C</code> – the selected Steps will then be copied to the clipboard as an image (which can be pasted into Microsoft Word or another application).
Properties	Opens the Properties tool pane of the DFC (this option is also available when an entity is in the active status).

Step

	Rename	F2
	Set Routing Output	
	Edit Description	Shift+F2
	Show/Hide Step Description	
	Cut	Ctrl+X
	Copy	Ctrl+C
	Paste	Ctrl+V
	Delete	Del
	Duplicate Selection	Ctrl+D
	Autolayout	Ctrl+Shift+A
	Save as Image...	F12
	Properties	F4

Command	Description
Rename	Changes the name of the selected step.
Set Routing Output	Enables setting a function output that will be used as an output routing of a DFC step.
Edit Description	Enables changing the step description .
Show/Hide Step Description	Toggles the visibility of the step description .
Cut	Copies one or more selected steps to the clipboard and removes them from the entity workspace and the Entity Explorer tree.
Copy	Copies one or more selected steps to the clipboard.
Paste	Inserts the last copied step from the clipboard into the entity workspace and the Entity Explorer tree .
