

# Toolbar

The toolbar offers convenient shortcuts for executing common tasks. They can be floated or locked to the application window.

## Standard Toolbar Buttons

The following are the standard icons available on the toolbar (the order of buttons might be different because you can move the toolbar segments):

| Icon | Function                         | Description                                                                                                                                                                                                                                                                                                                                                                                                                           |
|------|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|      | <b>New</b>                       | Displays <b>New Entity Wizard</b> , where you can create a new process, operation, DFC, screen, view, layout, action script, or project.                                                                                                                                                                                                                                                                                              |
|      | <b>Open</b>                      | Displays a dialog box that lets you open a process, operation, DFC, screen, view, layout, action script, or project.                                                                                                                                                                                                                                                                                                                  |
|      | <b>Save</b>                      | Saves the currently open entity.                                                                                                                                                                                                                                                                                                                                                                                                      |
|      | <b>Close</b>                     | Closes the currently open window.                                                                                                                                                                                                                                                                                                                                                                                                     |
|      | <b>Cut</b>                       | Copies the selected element of the step or function navigation to the clipboard and removes it from the entity workspace and the <b>Entity Explorer</b> tree.                                                                                                                                                                                                                                                                         |
|      | <b>Copy</b>                      | Copies the selected element of the step or function navigation to the clipboard.                                                                                                                                                                                                                                                                                                                                                      |
|      | <b>Paste</b>                     | Inserts the last copied element of the step or function navigation from the clipboard into the entity workspace and the <b>Entity Explorer</b> tree .                                                                                                                                                                                                                                                                                 |
|      | <b>Refresh</b>                   | Refreshes the workspace.                                                                                                                                                                                                                                                                                                                                                                                                              |
|      | <b>Undo</b>                      | Undoes a change.                                                                                                                                                                                                                                                                                                                                                                                                                      |
|      | <b>Redo</b>                      | Redoes a change (active only if <b>Undo</b> was used).                                                                                                                                                                                                                                                                                                                                                                                |
|      | <b>Advanced Find</b>             | Displays the <b>Advanced Find</b> tool pane.                                                                                                                                                                                                                                                                                                                                                                                          |
|      | <b>Recent and Favorite Items</b> | Displays the <b>Recent and Favorite Items</b> tool pane.                                                                                                                                                                                                                                                                                                                                                                              |
|      | <b>Background Tasks</b>          | Displays the <b>Background Tasks</b> tool pane.                                                                                                                                                                                                                                                                                                                                                                                       |
|      | <b>Toolbox</b>                   | Displays the <b>Toolbox</b> tool pane.                                                                                                                                                                                                                                                                                                                                                                                                |
|      | <b>Properties</b>                | Displays the entity <b>Properties</b> tool pane unless it is already open.                                                                                                                                                                                                                                                                                                                                                            |
|      | <b>Project Manager</b>           | Displays the <b>Project Manager</b> .                                                                                                                                                                                                                                                                                                                                                                                                 |
|      | <b>Entity Manager</b>            | Displays the <b>Entity Manager</b> .                                                                                                                                                                                                                                                                                                                                                                                                  |
|      | <b>Entity Explorer</b>           | Displays the <b>Entity Explorer</b> tool pane.                                                                                                                                                                                                                                                                                                                                                                                        |
|      | <b>Validate</b>                  | Validates if the selected entity is designed correctly and can be properly executed. The validation results are displayed: <ul style="list-style-type: none"> <li>▶ In the <b>Entity Validation Result</b> window – when the entity validation runs in <b>Entity Manager</b> or <b>Project Entity Manager</b>.</li> <li>▶ In the <b>Validation Messages</b> tool pane – when the entity validation runs in an open entity.</li> </ul> |
|      | <b>Compile</b>                   | Compiles a DFC in the prototype, development in progress, or active status or an action script.                                                                                                                                                                                                                                                                                                                                       |

|                                                                                  |                                  |                                                                                                                                                                                                                                            |
|----------------------------------------------------------------------------------|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   | <b>Test Run</b>                  | Opens the selected DFC or screen in <b>Test Run</b> .                                                                                                                                                                                      |
|  | <b>Designer</b>                  | Switches back to the <b>designer</b> view when DFC or screen are in the Test Run mode.                                                                                                                                                     |
|  | <b>Prototype</b>                 | Sets the entity status to prototype, development in progress, design in progress, or on hold. For more information, see <b>Entity Status Types</b> .                                                                                       |
|  | <b>Development in Progress</b>   |                                                                                                                                                                                                                                            |
|  | <b>Design in Progress</b>        |                                                                                                                                                                                                                                            |
|  | <b>On Hold</b>                   |                                                                                                                                                                                                                                            |
|  | <b>Show Usages</b>               | Displays the <b>pop-up window</b> listing all entities that use the selected entity.                                                                                                                                                       |
|  | <b>Compare</b>                   | Displays the <b>DFC Compare</b> tab for two selected DFCs or <b>Project Compare</b> tab for two selected project revisions.                                                                                                                |
|  | <b>New Revision/Duplicate</b>    | Displays the <b>Duplicate Entity</b> window to create a <b>new revision</b> of the selected entity or a <b>new entity</b> with a different name and revision. You can also select many entities and create a new revision for all of them. |
|  | <b>Check In</b>                  | Removes the lock from the selected entity.                                                                                                                                                                                                 |
|  | <b>Check Out</b>                 | Locks the selected entity for editing by the current user.                                                                                                                                                                                 |
|  | <b>Zoom In</b>                   | Zooms in on the <b>designer</b> view in a DFC.                                                                                                                                                                                             |
|  | <b>Zoom Out</b>                  | Zooms out of the <b>designer</b> view in a DFC.                                                                                                                                                                                            |
|  | <b>Generate Apriso Unit Test</b> | Generates Apriso Unit Test code for a DFC. For details, refer to <b>Apriso Unit Tests Framework Documentation</b> .                                                                                                                        |

## To Move the Toolbar

Drag the  (Move Handle) on a toolbar when it is docked and the **Lock the Toolbars** option is off. If the toolbar is dropped on the top, bottom, left, or right edges of the application window, it docks there. If it is dropped anywhere else, it becomes a floating toolbar.
