

Toolbox

This tool pane lets you quickly add the components to the contents of processes, operations, DFCs, steps, functions, layout editor, and step and task navigation in Issue Flows.

Elements Availability

The availability of components differs depending on the opened [entity workspace](#).

Actions

- To add an element, drag it from the toolbox to the opened entity workspace or [Entity Explorer](#) tree. In the case of [function navigation](#), you can also double-click the function icon.

Process, Operation, and Process Operation

Links

Dragging the element to the workspace or Entity Explorer displays a wizard that lets you add the selected link:

Link \ Available Target	Process 	Process Operation 	Operation 	Step 
 Characteristic	✓	✓	✓	✓
 Component	✓	✓	✓	✓
 Document	✓	✓	✓	✓
 Product	✓	✗	✗	✗
 Resource (resource types: Generic, Building, Container, Equipment, Land, Supplier, Collection)	✓	✓	✓	✓
 Specification (you can link only one specification)	✓	✓	✓	✗
 Work Center (you can link only one work center)	✗	✓	✗	✗

Task Permissions

Dragging the element to the workspace or Entity Explorer displays a wizard that lets you add the selected [task permission](#) to process operations, operations, or their steps:

-  Skill
-  Role
-  Employee
-  Employee class

Employee class is defined by the resource class of the person type.

DFC

Flow Elements (Special Nodes)

You can add the following nodes to step navigation:

- ▶  Stop/End
- ▶  Logout/Exit
- ▶  Back
- ▶  Skip/Abandon

Steps

Icon	Name	Description
	Step	Adds a new step to the DFC.
	Existing Step	Displays the list of DFCs from which you can choose an existing step.
	Decision Step	Adds a new decision step to the DFC.
	Step with Sub-DFC	Adds a new step with a linked DFC that is reused as a sub-DFC.

Function Navigation

Functions

You can add the following functions to the DFC step:

- ▶  3DEXPERIENCE Message
- ▶  Apriso Message
- ▶  Business Component
- ▶  Business Control
- ▶  DAL Query
- ▶  Determination
- ▶  Input to Output
- ▶  Local Determination
- ▶  MDX Query
- ▶  Message Broker
- ▶  MIScript
- ▶  Notification
- ▶  Show Message
- ▶  SQL Query
- ▶  Stored Procedure
- ▶  Sub-DFC
- ▶  Submit Print Request
- ▶  User Formula
- ▶  Web Service

Function Inputs

Functions can have inputs of the following sources:

- ▶  Constant
- ▶  Machine
- ▶  Previous function
- ▶  Session variable
- ▶  System parameter
- ▶  User

Function Outputs

Functions can have outputs of the following destinations:

- ▶  External output
- ▶  Machine
- ▶  Session variable
- ▶  User

Layout Editor

You can add the following controls to Layout Editor:

Layout Controls

- ▶  Grid (deprecated)
- ▶  Sub-DFC

Input Controls

- ▶  Text
- ▶  Long text
- ▶  Masked text
- ▶  Drop-down list
- ▶  Combo box
- ▶  Check box
- ▶  Button
- ▶  Radio button
- ▶  Date/Time picker
- ▶  Date picker
- ▶  Time picker
- ▶  File picker
- ▶  Selection list
- ▶  Spinner

For more information on input controls, see [User Interface Controls for Function Input](#).

Output Controls

- ▶  Text
- ▶  HTML
- ▶  Link

For more information on output controls, see [User Interface Controls for Function Output](#).

General Business Controls

- ▶  Authentication - 1.0
- ▶  Auto-Refresh - 1.0
- ▶  Background Image - 1.0
- ▶  Calendar - 1.0
- ▶  FlexPart - 1.0
- ▶  Grid - 1.0
- ▶  HTML Editor - 1.0
- ▶  Image - 1.0
- ▶  Scheduler - 1.0
- ▶  Tree - 1.0
- ▶  Visualization - 1.0

Functional Business Controls

- ▶  Attachment Browse - 2.0
- ▶  Attachment Link - 1.0
- ▶  Attachment View - 1.0
- ▶  Checklist - 1.0
- ▶  Cube Viewer - 2.0
- ▶  Dispatching Board - 3.0
- ▶  Flat File Mask Editor - 1.0
- ▶  Generate EMR Record - 1.0
- ▶  Map - 1.0
- ▶  Quality Defects Visualization (vQDT) - 1.0
- ▶  Quality Defects Visualization 3D (vQDT3D) - 1.0
- ▶  Safety Instructions - 1.0
- ▶  Work Instructions - 1.0
- ▶  Work Instructions 3D - 1.0

HTML Layout Editor

There is a possibility to add an additional sections to the toolbox. The sections and its content are fully customizable and contain user-defined snippets.

Icon	Name	Description
	Operator Cockpit Layout	Example of a custom snippet.

Issue Flow Step Navigation

Icon	Name	Description
	Step	Adds a new step to an Issue Flow.

Issue Flow Task Navigation

Icon	Name	Description
	Task	Adds a new task to a step in an Issue Flow.
