

Use Font Icons

When creating user interface elements in e.g., [HTML Layout Editor](#) and [HTML Editor](#), you can add icons which are defined in the default styles. For details, see the [CSS Framework Documentation](#).

3DS Icons

The CSS file containing the available styles is located in:

```
<drive>\Program Files\Dassault Systemes\DELMIA Apriso 2025\WebSite\Portal\Styles\Default\wux-3ds-fonticons.css
```

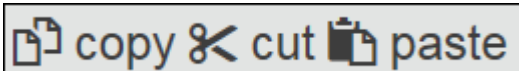

Below is a simple example that uses the "check" icon, note that `wux-ui-3ds` must be included in the class declaration:

```
<i class="wux-ui-3ds wux-ui-3ds-check" ></i> confirm
```

You can set the size of the font using `wux-ui-3ds-1x`, `wux-ui-3ds-2x` etc.

```
<div class="wux-ui-3ds-2x">
  <i class="wux-ui-3ds wux-ui-3ds-copy" ></i> copy
  <i class="wux-ui-3ds wux-ui-3ds-cut" ></i> cut
  <i class="wux-ui-3ds wux-ui-3ds-paste" ></i> paste
</div>
```

Note that you can set `wux-ui-3ds` as the class of the parent element to avoid redundancy:

```
<div class="wux-ui-3ds">
  <i class="wux-ui-3ds-copy" ></i> copy
  <i class="wux-ui-3ds-cut" ></i> cut
  <i class="wux-ui-3ds-paste" ></i> paste
</div>
```

You can also use values of Inputs (either [Screen Interface Inputs](#) or [HTML View Inputs](#)) inside the class:

```
<i class="wux-ui-3ds wux-ui-3ds-{icon}"></i>
```

Font Awesome Icons

The CSS file containing the available styles is located in:

```
<drive>\Program Files\Dassault Systemes\DELMIA Apriso 2025\WebSite\Default\Apr\apr.css
```

Examples:

```
<i class="fa fa-check"></i>
```

```
<i class="fa fa-check fa-2x"></i>
```

For more information, refer to the Font Awesome website.

Note that using the latest font awesome icons requires updating the icons on the DELMIA Apriso server.
