

User Input\User Output Controls

It is possible to design the layout of the User Input or Output from a specific Step. It will be replaced with the proper control (TextBox, ComboBox, etc.) in runtime.

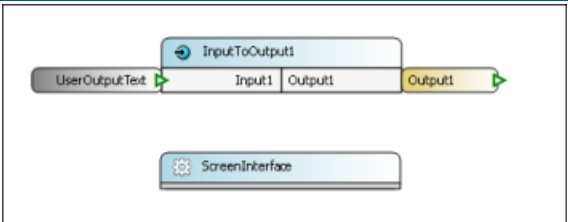

User Input

<div data-flx-input="FunctionName.InputName"/>

Function Navigation	HTML Layout Editor	Runtime
	CSSJavaScriptHTML 1<div data-flx-input="InputToOutput1.Input1"/> Function NavigationHTML Layout Editor HTML Layout Editor Code	Input1 OK

User Output

<div data-flx-output="FunctionName.OutputName"/>

Function Navigation	HTML Layout Editor	Runtime
	CSSJavaScriptHTML 1<div data-flx-output="InputToOutput1.Output1"/> Function NavigationHTML Layout Editor HTML Layout Editor Code	Output1 UserOutputText OK
