

View: Entity Explorer Right-Click Menu

View

Command	Description
Add Action	Adds an Action to the View.
Change Status	Changes the status of a View (for more information, see Entity Status Types).
Change Status Recursively	Recursively changes the status of a View. Recursive change means changing the status of the entity and all its child entities.
Copy All Actions	Copies all Actions that are added to the View.
Expand All	Expands the list of all Actions for the selected View.
Collapse All	Collapses the list of Actions for the selected View.
Refresh	Refreshes the diagram.

Action

Command	Description
Disable Action/Enable Action	Disables an Action or enables the Action, depending in which state it is. If the Actions is in the disabled state, the Action icon is greyed-out (it cannot be used but you can change its properties). This option can be available for Views that are in the active status. For details on how to enable it, see Entity Status Types.
Move Action Up	Moves the Action down in the structure (available only if there is at least one Action below the selected one). This option can be available for Views that are in the active status. For details on how to enable it, see Entity Status Types.
Move Action Down	Moves the Action up in the structure (available only if there is at least one Action above the selected one). This option can be available for Views that are in the active status. For details on how to enable it, see Entity Status Types.

Rename	Changes an Action's name. This also renames any references to this Action (e.g., in places where it is used as a Next Action).
Cut	Copies and cuts the selected entity.
Copy	Copies the selected entity.
Paste	Pastes the copied entity.
Delete	Deletes the selected entity.
Refresh	Refreshes the diagram.
